GANTRY AND BRIDGE SYSTEM FEATURES

Touch screen industrial PC utilizing Citect HMI software.

Longitudinal track and cables are located underneath the table in protection.
WELDING
This diagram shows a typical welding Gantry/Bridge unit design. The long tracks are located underneath the table providing protection. This also allows the work piece to be easily loaded at any point on the table as it is clear and easily accessible. The bridge unit can be equipped to automatically position and clamp the parts to be welded. It can also be supplied with mechanical, electronic or laser seam tracking equipment. Gullco can custom design a Gantry/Bridge system to meet your specific requirements.
