KBM-28® HEAVY DUTY BEVELLING MACHINES

KBM-28[®] & KBM-28U[®] Heavy Duty Portable, Self-Propelled Plate Edge

Bevellers produce clean machined bevels with **no thermal distortion** on mild steel, stainless steel and aluminum plate from 5/16" (8.0 mm) to 2" (50.0 mm) thick. The KBM-28U® bevels the underside of plate eliminating the need to flip the workpiece...**reducing time and cost**. Savings are further enhanced when both units are used in applications where both sides of the material require bevelling.

Adjustable Undercarriage...For Easy Height Adjustment

The KBM-28® units can be purchased with Gullco's exclusive adjustable height self-aligning springloaded caster wheel assembly for self-propelled bevelling along any length of plate maintaining a uniform bevel and consistent root face. Sold separate

Angle Bevel Pins...Enable Bevel Angle Adjustment

...KBM-28® units are supplied with angle bevel pins for 22 1/2°, 30°, 37 1/2°, 45° and 55° bevels. Pins for other bevel angles are available upon request.
