

OVERLAY WELDING GANTRY SYSTEM FOR ALL POSITIONS

The Welding Overlay System is designed to operate in all positions. Ideal for use on boiler tube walls, cladding boiler tube walls prior to installation in the boiler, pressure vessel tanks and other applications where overlay repair is required.

The overlay system allows for precise control of the travel speed which allows the operator to achieve clean consistent weld overlay patterns.

The entire system is made up of existing Gullco products and can be easily disassembled into various smaller components for transporting or maneuvering through tighter openings.

Gullco's team of in-house engineers can customize the system to meet specific application requirements and this is used commonly for unique circumferences or wall applications.

The design of the overlay system is made to optimize time with a quick track mounting system which allows for easy alignment with the work piece.

Precise remote control of the overlay system ensures consistent weld quality
